Over 10000 hours on this game before it got on steam

Kiss your life goodbye. Ridiculous, over-the-top, not politically correct, and definitely not the sort of thing on a Social Justice Warrior's wishlist. It's the Mortal Kombat of the current zeitgeist... with elastic cleavage and more "fan service" than you can shake a di... er, stick at. My favorite characters are JaeQuellen and E Hyundai. Be wary though, as there are rough edges to consider. The game requires a recent video card to run smoothly, the controls are kinda clunky, and there are all sorts of glitches. However, it's clearly a work in progress and what's here is enough to give anyone the 5 or 10 minutes of frequent satisfaction they need. As they say, sometimes you buy the full girlfriend experience (Street Fighter V, Tekken 7, etc) and sometimes you drop a tenner on seven minutes with a random (this game). Either way, you fall asleep happy.. waiting for the next one .nice to go through a story without any stress of getting stuck or killed. Great Game at a great price!

For the moment it supports English, Spanish and Greek languages! Many cases to play with, innovative game (haven't seen anything close to that) and it has a great potential for more features and cases!

PS. And super-friendly developer too! 5*. It may say that I have this game but I have actually never played or seen this in my life but it looks like it's for five year old's anyway.

My first dlc, use to regular on all lines, I use to ride on them as a kid, so I have soft spot for them,,

Good value for money... If you own a line with a lot of station's on, they're really good fun in QD.. Jumping: ON

Collission: ON Frindships: GONE

10/10. I have played alot of early access Vive games in the last few days. This is one of the best hands down. It includes multiplayer which is awesome(although given the current market penetration of these devices, I've never seen more than a couple of people in a game at a time). However, it is fast paced, realistic and fun. It is in the same vein as the Mount and Blade series if that were boiled down to an arcade medieval combat sim. Must buy for those early adopters of the vive.. Seems like a pretty good asteroids type game., varied enemies and powerups. Heatseeking missiles were my favorite. Got this game with the nuk games complete collection.. Originally sold as the "founders pack" with the promise that it would be for sale untille the game went free to play they then re-named it premium pack 1 and straight up gave is false promises. So we support the damn game, then get stabbed in the back. Blackspot eat a bag of\u2665\u
